Connection Fee

Date and number of tariff decision	Date of publication	Source of publication	Connection category		Payment fee by reliability category, RUB			Payment rate, RUB
			Capacity range, kW	Voltage level at connection point, kV	I	II	III	
<b>IDGC of Centre - Belgorodenergo The rates are fixed for 2012</b>								
<b>From 01.01.2012</b>								
29.12.2011 #19/7 (the fee is fixed for 2012)	07.03.2012	#39 (3109), Belgorodskie izvestiya	An applicant is a natural person, submitting an application for technological connection, of power installations, provided that the distance from site boundaries of an applicant to power grid facilities of voltage class necessary to an applicant of grid organisation, in which the application has been put, is not more than 300 meters in cities and urban-type settlements and not more than 500 meters in villages.	0,4 kV				550 (with VAT)
			An applicant is a legal entity that is not a VAT payer, submitting an application for technological connection, provided that the distance from site boundaries of an applicant to power grid facilities of voltage class necessary to an applicant of grid organisation, in which the application has been put, is not more than 300 meters in cities and urban-type settlements and not more than 500 meters in villages					550 (with VAT)
			An applicant is a legal entity that is a VAT payer, submitting an application for technological connection, provided that the distance from site boundaries of an applicant to power grid facilities of voltage class necessary to an applicant of grid organisation, in which the application has been put, is not more than 300 meters in cities and urban-type settlements and not more than 500 meters in villages					466,10 (without VAT)
			Technological connection of legal entities – non-commercial organisations for electric power supply to citizens – members of this organisation who pay according to the meter at lead-in, provided that connection of each member of the organisation is not more than 15 kW					550*number of members
			up to 100 kW inclusive					230
			above 100 to 750 kW inclusive					420
			above 750 kW					456
			up to 100 kW inclusive		6-10 kV			230
			For applicants applying for a grid connection and requesting the second or first category of power supply reliability, which requires a technological connection to two independent sources of power supply, the fee is determined for each grid connection to an independent power supply separately.					
			Payment for technological connection to power grids for customers with their connected capacity over 100 kW and 6-10 kV is fixed individually.					
Payment for technological connection to power grids of IDGC of Centre-Belgorodnergo of 35 kV and above and (or) capacity of 10 MVA and more is fixed individually in accordance with design and estimate documentation.								
For applicants – legal entities or private entrepreneurs for the purposes of technological connection of one-by-one power supply source of power receiving installations, which maximum capacity is up to 100 kW inclusive (taking into account that has been previously connected at this connection point) as well as individuals for the purposes of technological connection of power receiving installations, which maximum capacity is up to 15 kW inclusive (taking into account that has been previously connected at this connection point) used for housing and other needs which do not relate to business activities and power supply of which is provided for by one power source; in case of technological connection of power receiving installations of these applicants to power grids of voltage class up to 20 kV inclusive, payment for technological connection according to individual project is not fixed.								
<b>From 01.07.2012</b>								
			An applicant is a natural person, submitting an application for technological connection, of power installations, provided that the distance from site boundaries of an applicant to power grid facilities of voltage class necessary to an applicant of grid organisation, in which the application has been put, is not more than 300 meters in cities and urban-type settlements and not more than 500 meters in villages	0,4 kV				550 (with VAT)
			An applicant is a legal entity that is not a VAT payer, submitting an application for technological connection, provided that the distance from site boundaries of an applicant to power grid facilities of voltage class necessary to an applicant of grid organisation, in which the application has been put, is not more than 300 meters in cities and urban-type settlements and not more than 500 meters in villages					550 (with VAT)

			from 100 to 750 kW				10 298	10 298
			above 750 kW				10 527	10 527
			<b>Zone 5</b> Kimrsky, Rzhevsky, Kalyazinsky, Torzhoksky districts					
			up to 30 kW	0,4 kV			12 740	12 740
			above 30 kW				13 488	13 488
			up to 100 kW	6-10 kV			11 243	11 243
			from 100 to 750 kW				11 875	11 875
above 750 kW			12 105		12 105			
<b>Zone 6</b> Zubtsovsky, Kalininsky, Konakovsky								
up to 30 kW	0,4 kV			13 489	13 489			
above 30 kW				13 834	13 834			
up to 100 kW	6-10 kV			11 990	11 990			
from 100 to 750 kW				12 625	12 625			
above 750 kW				12 855	12 855			
<b>Zone 7</b> Tver								
up to 30 kW	0,4 kV			13 778	13 778			
above 30 kW				13 925	13 925			
up to 100 kW	6-10 kV			12 246	12 246			
from 100 to 750 kW				13 258	13 258			
above 750 kW				13 680	13 680			
If technically available to connect to each independent source of power supply then the fee for technological connection is defined as the sum of costs for technological connection to two sources, calculated per the rates approved by this order.								
<b>IDGC of Centre - Yarenergo</b>								

Date and number of tariff decision	Date of publication	Source of publication	Connection category		Payment fee by reliability category, RUB			Payment rate, RUB		
			Capacity range, kW	Voltage level at connection point, kV	I	II	III			
#8 of 14.02.2011 (in edition of #37-vi of 29.06.2011)	18.02.2011 (edition of 01.07.2011)	Dokument region #12 (157) (in edition of #50(195))	For applicants with maximum connected capacity of power receiving installations which does not exceed 15 kW inclusive (taking into account that it has been previously connected at this connection point), pay for works, provided that the distance from site boundaries of an applicant to items of power grid facilities of voltage class necessary to an applicant of grid organisation, in which the application has been put, is not more than 300 meters in cities and urban-type settlements and not more than 500 meters in rural areas:							
			- for legal customers, RUB/connection (for each power supply source), without VAT						466,1	
			- for residential customers, RUB/connection (for each power supply source), with VAT						550,0	
			Rate per 1 kW of technological connection with taking into account the costs of the connection type of the power receiving devices of the applicant either to a bay (TS, PTS, DS, SS), or a power line when the voltage class specified in the application corresponds to the connection voltage to the existing power grid facility (transformation of voltage is not required)							
			<b>Territorial Zone 1 (Yaroslavl and Rybinsk)</b>							
			up to 100 kW inclusive		up to 0,1 kV inclusive (0,4 kV)	14700	12600	10 500		
			above 100 kW			16100	13800	11 500		
			up to 100 kW inclusive		from 1 to 35 kV	12600	10800	9 000		
			above 100 kW		(6-10)	14000	12000	10 000		
			<b>Territorial Zone 2 (Pereslavl-Zaleski, administrative centres of districts of Yaroslavl region, Yaroslavsky, Pereyaslavsky, Uglichsky and Nekrasovsky municipal districts)</b>							
			up to 100 kW inclusive		up to 0,1 kV inclusive (0,4 kV)	10500	9000	7 500		
			above 100 kW			14000	12000	10 000		
			up to 100 kW inclusive		from 1 to 35 kV	7000	6000	5 000		
			above 100 kW		(6-10)	9800	8400	7 000		
			<b>Territorial Zone 3 (territories which are not specified in territorial zones 1,2,4)</b>							
			up to 100 kW inclusive		up to 0,1 kV inclusive (0,4 kV)	5600	4800	4 000		
			above 100 kW			8400	7200	6 000		
			up to 100 kW inclusive		from 1 to 35 kV	4200	3600	3 000		
			above 100 kW		(6-10)	7000	6000	5 000		
			Rate per 1 kW of technological connection with taking into account the costs of the connection type of the power receiving devices of the applicant either to a bay (TS, PTS, DS, SS), or a power line when the voltage class specified in the application does not correspond to the connection voltage to the existing power grid facility (transformation of voltage is required)							
			<b>Territorial Zone 1 (Yaroslavl and Rybinsk)</b>
