2.2.3. To adjust the list and share of annual KPIs based on input of the TSR indicator: to move the indicators of quality of services, reliability, load of newly commissioned capacity to the quarterly KPIs based on the need to adjust the weights;

2.2.4. To consider the appropriateness of use of the performance indicator in the annual KPI «specific revenues (net of irregular components) per employee». In establishing the target value of the indicator to use the actual value of the previous year (if necessary, adjusted by the ratio of the target profit of the current year to the actual average revenue earnings for the previous 3 years);

2.2.5. To consider the appropriateness of making changes and additions to the methodology for calculating and assessing the KPI «Growth rate of controllable operating expenses in the period to the fact of the previous period» in accordance with the comments set out in Appendix # 18 to this decision of the Board of Directors of the Company;

2.2.6. To consider the appropriateness of establishing values of a series of economic and financial KPIs, including higher EBITDA (for indicators for which a positive effect is a lower value - much lower), than that calculated based on the approved business plan of the Company, to motivate the executive bodies of the Company to perform over and above targets.
