Rosseti to construct more than 500 km of power transmission lines to supply electricity to the largest gas field in Eastern Russia

In the Irkutsk region, the construction of two parallel special crossings across the Lena River of 220 kV power lines, which are being constructed to supply the Kovykta gas condensate field, has begun. This is one of the most difficult stages of work: the length of the crossings will be 1,100 metres, the height of the towers will be over 60 metres. In total, within the framework of Rosseti's project, about 518 km of new transmission lines will be commissioned, as well as the reconstruction of the 500 kV Ust-Kut substation, the main power centre of the Peledui energy ring. The total investment will amount to RUB 28 billion.
