Kommersant: The government will encourage the regions to review the tariff system for the population

The Russian government wants to encourage regions to transfer the population to electricity tariffs taking into account consumption volumes. The Kommersant newspaper wrote about this on 2 October.

According to the proposal of the Cabinet of Ministers, regions that have switched to new tariffs will be able to exceed the maximum amount of cross-subsidization, when businesses pay extra to reduce tariffs for the population. An alternative for regions is to subsidize tariffs from their own budgets.

"Potentially, the initiative will force the entire country to switch to new tariffs, since almost all regions in 2024, when setting tariffs, will go beyond the established subsidy ceiling," the newspaper notes.
