### Scientists achieved a breakthrough in production of solar cells

Scientists from the Faculty of Chemistry of Moscow State University and a team of researchers from 12 universities around the world have made a breakthrough in the creation of perovskite solar cells, opening up prospects for increasing the share of solar energy, the university's press service reported. Their new method produces perovskite solar cells with large area, high efficiency and durability. The developed technology for creating perovskite solar cells based on formamidinium lead iodide is recognized as one of the most promising today.
