

ELECTRIC POWER INDUSTRY NEWS

Artificial intelligence becomes an integral part of the energy complex of the Russian Federation

Improving artificial intelligence technologies is one of the main tasks of Russia's national development strategy until 2030. The implementation of "smart" systems is taking place in various industries, including the energy sector. In large energy systems, it is already impossible to do without AI, and the list of projects in the field of artificial intelligence in the domestic energy market is updated annually.

COMPANY NEWS

Yarenergo: vandalism at electric power facilities is unacceptable

Cases of vandalism against metering devices have become more frequent in the Yaroslavl region. With a difference of several days, specialists of the branch "Rosseti Centre Yarenergo" recorded 2 facts of shooting of commercial metering devices that were installed as part of the modernization of the electricity metering system.
