AI data centre capacity in Japan to increase 4.5-fold by early 2030s

The total capacity of data centres linked to artificial intelligence systems in Japan is set to increase nearly 4.5-fold by the early 2030s compared to levels at the end of 2025. This growth will propel the country to third place globally, trailing only the US and China, reports TASS, citing the business newspaper Nikkei, which aggregated the production plans of 26 leading domestic companies in the sector.
