Russian nuclear power plants began to generate more electricity

Since the beginning of 2023, Russian nuclear power plants have increased electricity generation from the annual balance target of the Federal Antimonopoly Service of the Russian Federation by 2.37% to 100 billion kWh. This was announced by the Rosenergoatom concern. Electricity was generated by all 11 nuclear power plants operating in the country, including the floating nuclear thermal power plant (FNPP) in Chukotka. The operation of the nuclear power plants made it possible to prevent emissions of greenhouse gases into the atmosphere in the amount of about 50 million tons of CO2 equivalent.
