AFK Sistema agreed with the government on the development of hydrogen energy

AFK Sistema signed an agreement of intent with the authorities on the development of hydrogen energy, the press service of the government reports. The document was signed by Deputy Prime Minister Alexander Novak and Corporation President Tagir Sitdekov. The agreement is aimed at stimulating new developments, commercialization and implementation of domestic hydrogen technologies in various sectors of the economy, defines the principles of interaction between the parties within the framework of the "road map" for the development of this high-tech area in Russia until 2024.

Tverenergo is testing thermal indicators at substations in the Tver region

Since the beginning of 2023, about 5,000 temperature indicators have been installed at substations and other power facilities in Tverenergo's service area. This is the name of special stickers that irreversibly change colour when contact connections are overheated. Experience in the operation of power equipment shows that contact connections are one of the weak points in the diagnosis and control of power supply devices. Their overheating can lead to damage to electrical equipment, process failures and fires.
