Intelligence drawn to power: AI to drive about 70% of data centre energy consumption growth in Russia

Analysts at the National Rating Agency estimate that data centre energy consumption in Russia will reach 26.2 billion kWh by 2030 – a 76% increase over the 2025 levels. AI operations will account for the bulk of this growth. While experts predict a near-term distribution of computing capacity across regions, market players view this prospect with greater caution.

COMPANY NEWS

Rosseti Centre's power engineers increased substation capacity in the Smolensk region

As part of its investment program, the branch of Rosseti Centre – Smolenskenergo has completed a major upgrade of a 35/6 kV substation in the Smolensky district. Originally commissioned in 1979, the facility had reached maximum load capacity, limiting the ability to connect new customers. The two-stage modernization project involved installing two new power transformers, each with a capacity of 10 MVA.
