

ELECTRIC POWER INDUSTRY NEWS

Data centres in the regions where Rosseti operates consume 1 GW of energy, and there are contracts for 1.5 GW

Data centres in the regions where Rosseti operates in the Russian Federation currently consume more than 1 GW of electricity, and contracts have been signed for another 1.5 GW, said the company's head Andrey Ryumin at the "Solutions for a New Technological Order" forum. Ryumin noted that this volume is significantly higher across the country as a whole.

COMPANY NEWS

The Orel branch of Rosseti Centre has produced more than 3.5 thousand metal structures

The branch of Rosseti Centre - Orelenergo actively develops its own production of metal structures. Since the beginning of 2025, specialists have manufactured more than 3,500 products in workshops based in the Livensky and Orlovsky Distribution Zones. In-house production allows power engineers to optimize the production cycle and reduce the costs of implementing the repair program.

Rosseti Centre and Volga region cleared over 570 hectares of routes in Mari El

The branch of Rosseti Centre and Volga region - Marienergo is implementing a set of measures to improve the reliability of power supply and reduce the risks of technological disruptions, including during peak loads. One of the key areas of this work is clearing routes of overhead power lines (PL) of all voltage classes. This measure helps prevent technological disruptions at power facilities due to branches and trees falling on wires in adverse weather conditions.
