Prospects for the development of the Russian Federation's hydropotential to be presented in the near future — the Ministry of Energy

Prospects for the development of the hydropotential of the Russian Federation will be presented in the near future; now experts are working on its assessment, taking into account the overall energy balance. This was announced by First Deputy Head of the Ministry of Energy of the Russian Federation Pavel Sorokin.

"Currently, work is underway to assess the potential, it is very in-depth, proposals will be presented in the near future where there is a real prospect. It is necessary to take into account both the cost and the burden on the consumer, how this will affect the overall energy balance," he said at a meeting of the Public Council under the Ministry of Energy of the Russian Federation.

COMPANY NEWS

Smolenskenergo is developing production of metal structures

Since 2021, the branch has been operating a workshop for production of metal structures. It is organized on the basis of the Vyazemsky Distribution Zone, which last year became highly automated. The production facility produces all the necessary metal structures for repairs of power equipment, as well as for grid connection facilities, additional services and unscheduled repair and restoration work.
